

## Keeping passengers, crew and employees safe...keep infection out!

A fever is the primary indication of a contagion being present. WelloStation provides a quick, automated, no touch body temperature screening for passengers, crews and airport workers. The system is highly portable and can be deployed at multiple locations around an airport or on an aircraft. Stop contagions from entering your aircraft and facilities by fever screening.

### APPLICATIONS

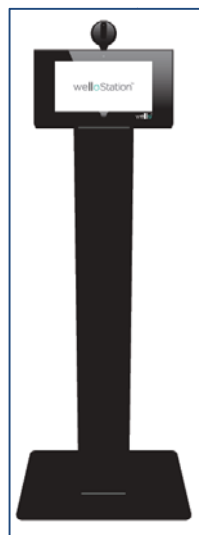

- Screening Persons at Check-in.
- Screening Persons at Boarding Gate.
- Screening Persons at Door of the Aircraft.
- Screening Persons entering or exiting Terminal.
- Screening Persons entering facilities.

### CAPABILITIES

- MRZ, QR Code and RFID reading capability.
- Wireless Connectivity – Cloud Access.
- Customizable data-base with automated reporting tools.
- User Friendly Interface with clear feedback.
- Rugged Hardware with ability to operate in harsh environments.

### FEATURES

- No Touch Fever Scan
- Rapid FEVER or NO FEVER Notification
- Fever Scan Data Recorded and Linked to Passenger & Passport Data
- Photograph and Data Storage
- Accurate to 0.10°C / 0.18°F
- HIPAA Compliant cloud powered
- Tracing and Investigative Tools
- Environmentally Friendly
